First Life Lost In Erection Of Traffic Bridge

The first life was spent in the erection of the new Jeffersonville, Louisville traffic bridge shortly after 2:30 o'clock Wednesday afternoon when Richard Pilton, 26 years old, Jeffersonville, was struck on the right temple by an iron crank he was using to tighten a wire rope near Pier No. 5 of the bridge. The blow knocked the workman off a barge at the side of the pier and his body landed in the river. It was recovered by United States Coast Guardsmen within five minutes after the accident.

Deputy Coroner Joseph Beck of Louisville said Pilton's death was due to a fractured skull. The man had been employed two months by the American Bridge Company, which has the contract for the steel work on the municipal bridge. Four other workmen were nearby when Pilton was knocked into the river. Edward Gibbs, Frank Pezzullo, Edward Connelly, Alfred Sult and William Seibert were the Coast Guardsmen who recovered the body.

For more than a year, workmen have been engaged in the erection of the traffic bridge across the Ohio river from Jeffersonville to Louisville. A safety program inaugurated by all companies and contractors who have placed men in the service of this erection has been recognized as efficient in that this is the first fatal and serious accident that has occurred.

Pilton is survived by his wife, Mrs. Ellen Pilton; two small children, Richard Pilton, Jr., 2 and Betty Jane Pilton, 3; and his parents Mr. and Mrs. Thomas Pilton of Evansville. The body was taken to the home of the Rev. C. S. Whitted at 229 East Chestnut street, Jeffersonville. Mrs. Whitted is an aunt of Pilton.

Funeral services are to be held at 7:30 o'clock tonight at the Whitted home in charge of the Rev. Mr. Whitted. The body is to be taken to Boonville, Friday morning for burial.

4 Men Receive \$200 Reward

A reward of \$200 to be divided equally between Frank Potter, Frank Meyer, Kenneth Meyer and Milton Lawler, for the conviction of Hery Perry in Clark County on a charge of stealing chickens, has been made by the Clark County

Saddle Horses Available At Pokagon Park

TENNIS COURT DEMAND AT ANOTHER CENTER GROWS SAYS REPORT

Special to The Evening News
Indianapolis—The first organized effort to maintain saddle horses at a state park for visitors desiring to view the scenic beauty of the place from horse back and who delight in this form of healthful recreation, has gone into effect at Pokagon, Indiana's great inland lake park, on the shores of Lake James.

Mrs. Edward Schulte of Fort Wayne, has been granted the saddle horse concession, Richard Lieber, conservation director, announced today, and will stable a number of fine, gaited animals at the park this summer. The animals will be rented at reasonable prices. In order that horseback riding be more enjoyable, several picturesque bridle paths have been made which lead through the hinterland and along the margin of Lake James. This new service will most likely be extended to other state parks this summer, Mr. Lieber said.

One tennis court at McCormick's Creek Canyon state park near Spencer is so popular with visitors this summer that conservation department officials are contemplating building a second court, it was announced today. Tennis is sharing popularity with horse-shoe pitching and several places have been set aside where park visitors may try their skill at this age-old sport. Matches are often arranged in both sports and spirited contests result.

Conservation director Richard Lieber announced today the swimming pool will open in a few days and it is expected to be more popular than last year when it was largely responsible for doubling attendance at the park. The department is erecting a new bath house this spring, from native stone quarried in the park, and it will be ready for use in a few days. The bath house is equipped with showers and will service 400 bathers simultaneously. Stone used in its construction came from the same quarry which produced the foundation stone for the State Capitol Building in Indianapolis. By using State Rd. 37 to Bloomington then Rd. 46 to the Park, Indianapolis people have pavement virtually all the way.

President Hoover... the campaign that he would aggressively urge adoption of a sound farm policy has been redeemed at the very beginning of his administration," said the Republican leader of the Senate.

Turbulent Session
"It was a turbulent session of the Senate, but that was to be expected when it is remembered the farm issue, with all the varied remedies proposed, has been a burning question for nearly eight years' I have a feeling of great satisfaction that we have adopted a permanent farm policy so soon, considering the unsatisfactory Senate situation.

"My contacts with President Hoover, a man of unusual constructive ability, cause me to be certain farmers may pin their faith in him to carry out the policy adopted in a manner that will eventually put agriculture on a higher economic level. But I want to urge my farmer friends to be patient and not expect too much in a day. It will take time to put agriculture where it belongs. But they have every reason to be encouraged with the knowledge that President Hoover appreciates agriculture represents the biggest domestic problem and that he has the will to apply all his talents to putting the farmer into position to help himself."

To Conduct Hearings
While Congress goes into recess, there will be no vacation for Senator Watson and seventeen of his senatorial colleagues. They must remain here during the heated period to conduct hearings on the tariff bill, a two months' task Senator Watson has been designated to conduct all the hearings as they relate to agriculture so that his duty in connection with the tariff bill are the most important. He has declined all invitations to speak and will remain here throughout the summer. The entire recess period will be occupied by the tariff hearings.

Watson is not relieved from work by the recess, but he is relieved from a lot of worries by the Senate going home. His tasks as leader have been most exasperating and they promise to be even more so when the Senate returns to consider the tariff bill.

President Hoover also will remain on the job in Washington, having given up all thought of a vacation. He will depend upon Saturday visits to his Virginia fishing retreat for his recreation.

11 Sellersburg Residents On Waltman Bond

Eleven prominent residents of Sellersburg, with property holdings valued at \$228,500 became bondsmen on a \$3,000 bond for the release of Albert Waltman, 18 years old, Speed Boxer, who was arraigned and plead not guilty to a charge of manslaughter before Judge George C. Kopp in a vacation session of the Clark Circuit Court on Thursday morning.

The arrest of Waltman followed an inquest into the death of James Coston, 32 years old, Blue Lick, a few days ago at his home, when Coroner Asa D. Combs, found that Coston's death was due to a blow on the nose imposed by Waltman in a shed at Speed.

Five eye witnesses at an inquest held Monday at Speed testified that Coston and Waltman were engaged in repairing the Pennsylvania Railroad bridge at Speed. Coston ac-
